

## Finding Help with Power Automate

There is a team of experts available to help end users develop Power Automate flows. To engage this team, a Public Team site is available which is monitored by the Power Automate experts. End users with Power Automate questions can find the Public Team by following these instructions.

1. **Launch Microsoft Teams** either using a client on your desktop or by a web browser. **Click Teams** in the left-hand navigation and then **click** the text in the bottom-left corner, **“Join or create a team.”**

2. You should now see the **“Join a team”** screen where you will be able to enter a code to locate the Power Automate Team. In the **“Enter code”** box, enter the code **yxe90of** and **click the Join team button**.

- The Power Automate Team will be added to your Teams list and available in the left-hand panel of the Teams application.
