New York State Information Technology Policy	No: NYS-P13-001
IT Policy: Information Security Exception	Updated: 02/07/2020
	Issued By: NYS Office of Information Technology Services Owner: Chief Information Security Office

1.0 Purpose and Benefits

The purpose of this policy is to provide a method for obtaining an exception to compliance with a published New York State (NYS) Office of Information Technology (ITS) information security policy or standard.

2.0 Authority

Section 103(10) of the State Technology Law provides ITS with the authority to establish statewide technology policies, including technology and security standards. *Section 2 of Executive Order No. 117* provides the State Chief Information Officer with the authority to oversee, direct and coordinate the establishment of information technology policies, protocols and standards for State government, including hardware, software, security and business re-engineering. Details regarding this authority can be found in NYS ITS Policy, [NYS-P08-002 Authority to Establish State Enterprise Information Technology \(IT\) Policy, Standards and Guidelines](#).

3.0 Scope

This policy applies to all “State Government” entities as defined in Executive Order 117 or “State Agencies” as defined in Section 101 of the State Technology Law (“State Entities”), their employees, and all others, including third parties (such as local governments, consultants, vendors, and contractors), that use or access any ITS Information Technology Resource for which ITS has administrative responsibility, including systems managed or hosted by third parties on behalf of the ITS. Where a conflict exists between this policy and a State Entity’s policy, the more restrictive policy will take precedence.

4.0 Information Statement

An exception may be granted by the ITS Chief Information Security Officer (CISO), or their designee, for non-compliance with a policy or standard resulting from:

- Implementation of a solution with equivalent protection to the requirements in the CISO policy or standard.
- Implementation of a solution with superior protection to the requirements in the CISO policy or standard.
- Impending retirement of a system.
- Inability to implement the policy or standard due to some limitation (e.g., technical constraint, business limitation or statutory requirement).

Exceptions are reviewed on a case-by-case basis and their approval is not automatic. Exceptions that are granted will be for a specific period of time. Upon expiration of the exception, an extension of the exception may be requested, if it is still required.

The exception request must be submitted on a completed [Exception Request Form](#) and must include:

- Description of the non-compliance
- Anticipated length of non-compliance
- Proposed assessment of risk associated with non-compliance
- Proposed compensating controls for managing the risk associated with non-compliance
- Proposed corrective action plan
- Proposed review date, if less than one year, to evaluate progress toward compliance
- The Exception Request Form must be signed by the following:
 - Information/business owner
 - Chief Information Officer (CIO)
 - Information Security Officer (ISO)/designated security representative
 - Commissioner/Executive Deputy Commissioner

If the non-compliance with the security policy or standard is due to a superior solution, an exception is still required and will normally be granted until the published policy or standard can be revised to include the new solution.

Upon submission of the Exception Request Form, the CISO's office will contact the requester to confirm receipt and request additional information, if needed. Once all required information has been received, the CISO will either grant or deny the request.

Upon approval, the CISO's office will send the approved Exception Request Form to the requestor. If the request is denied, the Exception Request Form will be returned with a brief explanation of why the CISO denied the request.

In the event that the request is denied, the Commissioner/Executive Deputy Commissioner and the CIO who signed the Exception Request Form may request a meeting with the State CIO and the CISO to discuss the circumstances giving rise to the request and means of addressing those circumstances.

5.0 Compliance

This policy shall take effect upon publication. Compliance is required with all enterprise policies and standards. ITS may amend its policies and standards at any time; compliance with amended policies and standards is required.

6.0 Definitions of Key Terms

Except for terms defined in this policy, all terms shall have the meanings found in <http://www.its.ny.gov/glossary>.

7.0 Contact Information

Submit all inquiries and requests for future enhancements to the policy owner at:
