

Webex Assistant for Webex Meetings

Webex Assistant is an intelligent, interactive virtual meeting assistant that uses voice commands. You can ask Webex Assistant to follow up on action items, take note of important decisions, and highlight key moments during a meeting. Record your meeting or webinar to get a post-meeting transcript.

Where is Webex Assistant for Meetings available?

Webex Assistant, available in Webex Meetings desktop, mobile, and web app versions, will now be enabled, by default for all existing MeetNY host accounts as well as new host account requests. During a meeting, hosts will be able to turn on or turn off Webex Assistant. Currently, Webex Assistant only accurately transcribes dialogue in English.
